

I listen to nothing but XM radio since I purchase my new vehicle that had it installed. When I travel, I request a GM vehicle with XM. The NAB have NO right to dictate that XM radio is bad. It is no different than any other industry having someone build a "better mouse trap." If XM radio is hurting their business, then they should consider how THEY need to improve their broadcasts instead of trying to eliminate the "new kids on the block!!!" Therefore, I respectfully request you reject NAB's petition 04-160.
